

Classification

Clearly structured and rapid documentation of tympanoplasty procedures

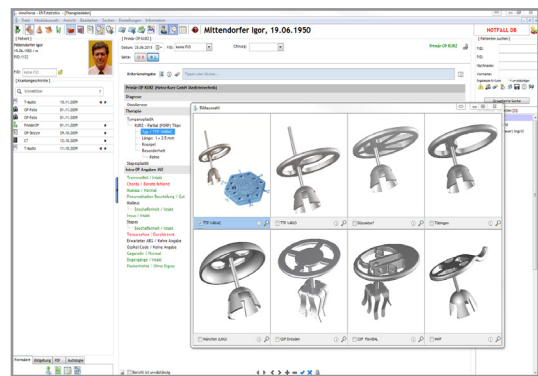

With the help of the KURZ classification for ENTstatistics, the documentation of your tympanoplasty procedures becomes child's play. You can register all relevant information on the treatments you have provided with just a few mouse clicks. From diagnosis, type of KURZ prosthesis employed, interoperative findings to important surgical images - all such information can be entered in the user-friendly database in no time at all. Thanks to the electronic interfaces with the devices of all standard manufacturers, audiograms are automatically imported.

Evaluation simply by mouse click

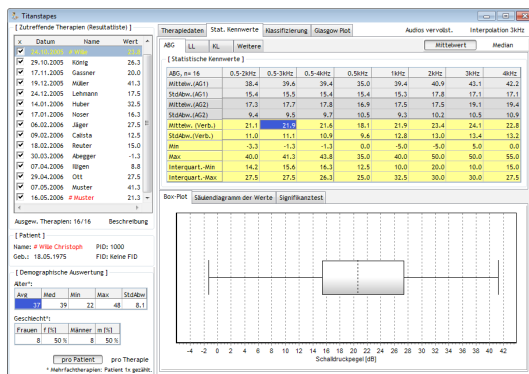

ENTstatistics offers numerous data analysis modes that will support surgeons in their work. Treatment information stored in the database can be evaluated from the point of view of a variety of different aspects while key statistical indicators, such as average improvement of the ABG, can be immediately calculated and even displayed in graph form. With just a few mouse clicks you can juxtapose the outcomes for various patient groups and compare these.
